<u>AMENDMENTS TO THE CLAIMS</u>

Please amend claims 1, 12, 14-20, 26, and 28-31.

Please add new claims 34-48. This listing of claims will replace

all prior versions, and listings, of this application.

<u>Listing of Claims</u>:

    1.   (Currently Amended) A method for providing

wagering interfaces comprising:

        configuring a first wagering interface on a first

<u>type of</u> wagering platform;

        storing a configuration of the first wagering

interface; and

        displaying a second wagering interface on a

second <u>type of</u> wagering platform<u>, wherein the second wagering

interface</u> ~~that~~ is consistent with the configuration of the first

wagering interface<u>, and wherein the second type of wagering

platform is different than the first type of wagering platform</u>.

    2.   (Original) The method of claim 1 wherein

configuring the first wagering interface comprises selecting a

wagering preference.

3.   (Original) The method of claim 2 wherein selecting the wagering preference comprises selecting a wagering sport.

4.   (Original) The method of claim 2 wherein selecting the wagering preference further comprises selecting a player type, wherein the player type is one of beginner, intermediate, or advanced wagerer.

5.   (Original) The method of claim 2 wherein selecting the wagering preference further comprises selecting and ordering menu options for display in the first wagering interface.

6.   (Original) The method of claim 2 wherein selecting the wagering preference further comprises selecting the wagering preference for the second wagering interface.

7.   (Original) The method of claim 2 wherein selecting the wagering preference further comprises selecting a different wagering preference for the second wagering interface.

8.   (Original) The method of claim 1 wherein configuring the first wagering interface comprises selecting a default wagering selection.

9.   (Original) The method of claim 1 wherein storing the configuration comprises storing a preference and a default wagering selection in a database.

10.   (Original) The method of claim 9 comprising providing the database in a wagering data hub.

11.   (Original) The method of claim 9 comprising providing the database in a subscriber management system.

12.   (Currently Amended) The method of claim 9 comprising providing the database in the first type of wagering platform.

4

13.   (Original) The method of claim 1 wherein storing the configuration comprises storing a preference and a default wagering selection in multiple databases.

14.   (Currently Amended) The method of claim 1 wherein displaying the second wagering interface comprises retrieving the configuration from the first type of wagering platform.

15.   (Currently Amended) The method of claim 14 further comprising processing the configuration so that the second wagering interface is suitable for display on the second type of wagering platform.

16.   (Currently Amended) A system for providing a wagering interface comprising:

a first type of wagering platform that configures a first wagering interface;

a storage unit containing a configuration from the first wagering interface; and

a second _type of_ wagering platform that displays

a second wagering interface, _wherein the second wagering_

interface is consistent with the configuration _of the first_

wagering interface, and wherein the second type of wagering

platform is different than ~~from~~ the first _type of_ wagering

platform.

17.   (Currently Amended) The system of claim 16

wherein the first _type of_ wagering platform is a set-top box.

18.   (Currently Amended) The system of claim 16

wherein the first _type of_ wagering platform is a computer.

19.   (Currently Amended) The system of claim 16

wherein the first _type of_ wagering platform is a two-way data

enabled cellular telephone.

20.   (Currently Amended) The system of claim 16

wherein the first _type of_ wagering platform is a telephone.

21.   (Original) The system of claim 16 wherein the first wagering interface comprises a wagering preference selected by a wagerer.

22.   (Original) The system of claim 16 wherein the first wagering interface comprises a default wagering selection selected by a wagerer.

23.   (Original) The system of claim 16 wherein the storage unit comprises a database.

24.   (Original) The system of claim 23 wherein the database is located in a wagering data hub.

25.   (Original) The system of claim 23 wherein the database is located in a subscriber management system.

26.   (Currently Amended) The system of claim 23 wherein the database is located in the first type of wagering platform.

27. (Original) The system of claim 16 wherein the storage unit comprises multiple databases.

28. (Currently Amended) The system of claim 16 wherein the second type of wagering platform is a set-top box.

29. (Currently Amended) The system of claim 16 wherein the second type of wagering platform is a computer.

30. (Currently Amended) The system of claim 16 wherein the second type of wagering platform is a two-way data enabled cellular telephone.

31. (Currently Amended) The system of claim 16 wherein the second type of wagering platform is a telephone.

32. (Original) The system of claim 16 wherein the second wagering interface comprises a wagering preference selected by a wagerer from the storage unit.

33. (Original) The system of claim 16 wherein the second wagering interface comprises a default wagering selection from the storage unit.

34. (New) A machine-readable medium encoded with machine-readable instructions for use in a system that provides wagering interfaces, the machine-readable instructions configured to:

provide a first wagering interface on a first type of wagering platform;

store a configuration of the first wagering interface; and

display a second wagering interface on a second type of wagering platform, wherein the second wagering interface is consistent with the configuration of the first wagering interface, and wherein the second type of wagering platform is different than the first type of wagering platform.

35. (New) The machine-readable medium of claim 34, wherein the machine-readable instructions configured to provide

9

the first wagering interface is further configured to receive a

selection of a wagering preference.

36.   (New) The machine-readable medium of claim 35,

wherein the machine-readable instructions are further configured

to receive a selection of a wagering sport.

37.   (New) The machine-readable medium of claim 35,

wherein the machine-readable instructions are further configured

to receive a selection of a player type, wherein the player type

is one of beginner, intermediate, or advanced wagerer.

38.   (New) The machine-readable medium of claim 35,

wherein the machine-readable instructions are further configured

to receive a selection and order of menu options for display in

the first wagering interface.

39.   (New) The machine-readable medium of claim 35,

wherein the machine-readable instructions are further configured

to receive a selection of the wagering preference for the second

wagering interface.

40. (New) The machine-readable medium of claim 35, wherein the machine-readable instructions are further configured to receive a selection of a different wagering preference for the second wagering interface.

41. (New) The machine-readable medium of claim 34 wherein the machine-readable instructions are further configured to provide a default wagering selection.

42. (New) The machine-readable medium of claim 34 wherein the machine-readable instructions are further configured to store a preference and a default wagering selection in a database.

43. (New) The machine-readable medium of claim 42 wherein the database is provided in a wagering data hub.

44. (New) The machine-readable medium of claim 42 wherein the database is provided in a subscriber management system.

11

45. (New) The machine-readable medium of claim 42 wherein the database is provided in the first type of wagering platform.

46. (New) The machine-readable medium of claim 34 wherein the machine-readable instructions are further configured to store a preference and a default wagering selection in multiple databases.

47. (New) The machine-readable medium of claim 34 wherein the machine-readable instructions configured to display the second wagering interface are further configured to retrieve the configuration from the first type of wagering platform.

48. (New) The machine-readable medium of claim 47 wherein the machine-readable instructions are further configured to process the configuration so that the second wagering interface is suitable for display on the second type of wagering platform.
